NEW REGULATION FIXES 10 MARTENS
AS BAG LIMIT FOR ALASKA TRAPPER

The Secretary of Agriculture has prescribed 10 martens as the bag limit for trappers in Alaska during the open seasons specified for these fur bearers. This is an amendment to the regulations respecting game animals, land fur-bearing animals, and birds in Alaska, which become effective in the Territory on July 1, 1930. The new amendment becomes effective on August 1, 1930. The previous amendments to the regulations this year had fixed the open seasons for trapping marten in Fur District 1 from December 16 to January 15; in District 2, north of the summit of the Alaska Range and Ahklun Mountains, November 16 to March 1, and south of the range from November 16 to January 31; and in District 3, December 1 to March 31.

The Bureau of Biological Survey also directs attention to the requirement that before they may be sold, shipped out of the Territory, or otherwise disposed of, marten skins must be sealed with a seal prescribed by the Alaska Game Commission within 90 days after the close of the open season during which they were taken.

Copies of the text of the Alaska game law regulations (Alaska Game Commission Circular No. 7) and the amendment respecting the limit on martens may be obtained on request addressed to the Alaska Game Commission, Juneau, Alaska.
